

YASCL Grammar

Basic grammar concepts

Word order*[1]

The word order of YASCL is OSV (object^[2], subject^[3], verb).

Let's take the sentence *The big dog bit the small man* as an example. YASCL doesn't have articles, so we will drop them here. *Big dog bit small man*. Now, let's change the word order to OSV. *Big dog* is the subject, *small man* is the object, and *bit* is the verb. So, the final sentence would look like this: *Small man big dog bit*.

What doesn't YASCL have?*

- Grammatical gender^[4]
- Articles (like English *the*, *a[n]*, German *der*, *die*, *das*, French *le*, *la*)
- Cases.^[5]
- Tenses.
 - There are no tenses in YASCL. Instead, the tense is simply stated as a word in the sentence (like *[WORD FOR EARLIER]* - earlier, *[WORD FOR YESTERDAY]* - yesterday, *[WORD FOR LATER]* - later, *[WORD FOR TOMORROW]* - tomorrow). Because of this system, there are no verb tenses and the tense can be stated very easily without having to create a verb tense system.

1 The asterisk means that this feature is not yet finished/set in stone. [^](#)
